Nevada City Nugget

VOL. VI, NO. 39 | The GOLD Center | NEVADA CITY, CALIFORNIA | The County Seat Paper | FRIDAY, AUGUST 5, 1932

TWIN SISTERS MINING COMPANY HAS BEEN NEWLY REORGANIZED

PRODUCTION TO BE RESUMED AT THE MINE AND CONTRACT TO BE LET ON TUNNEL WORK

The Twin Sisters Mining Company, Whose property consists of seven claims along the serpentine-amphiblite contact at Snow Point, Nevada county, twenty-five miles above Nevada City, have completely reorganized their company and will start immediately to resume production.

The Twin Sisters vein lies two miles southeast of the Rainbow-Ireland and Plumbago mines, which were large producers of high grade ore. The vein is probably thesouthern exension of either one or the other of these veins. It outcrops in the amphibolite a short distance west of the serpentine contact dipping to the west at an average of 60 degrees.

The mine has been developed by three tunnels and a number of shallow cuts along the outcrop. It was first exposed in the Hegarty tunnel which was run for gravel in 1886. High grade quartz was exposed along the bedrock for some 250 feet south of the tunnel and was supposed to be the source of thegold in th erich gravel taken from these workings.

No. 3 tunnel, through which the present operations are carried on, reaches No. 1 vein at a distance of 1070 feet and No. 2 vein in 1230 feet from the mouth.

No. 2 vein which has been followed southerly for 350 feet is being advanced on a three foot vein of mineralized quartz and a contract is being let to complete the upraise from this drift to the No. 2 tunnel, 330 feet above, as quickly as possible. A notice to contractors for this work will be found elsewhere in this issue of The Nugget.

The mine is equipped with a ten-stamp mill and flotation unit; electric power being brought in from the Spanish line of the P. G. & E., which passes over the property.

Dr. E. R. Berger of Geyserville, who is interested in the property, was in Nevada City Tuesday on his way back, after a stay of several days at the mine. The principal stockholders reside in Sonoma and Mendocino counties and the head office is at San Rafael.

GRASS VALLEY GARAGE BURNS TO GROUND

The Grass Valley Garage, Inc., the largest garage in Grass Valley, sustained a heavy loss in an early Sunday morning blaze.

It is situated on Mill street, a short distance below Neal and close to the business center. Prompt action of the fire department saved the city from further loss by fire.

Before being brought under control the entire iron roof was either burned through or warped beyond possibility of replacement and the large ground floor establishment had also sustained heavy damage.

The company was recently reorganized, as was announced by President C. H. Taylor, with an entire change of personnel and sales methods under the direction of C. K. Heffren, recently of Sacramento.

It is thought the damage to building and stock will amount to about $20,000.

The garage will be rebuilt as soon as the insurance is adjusted, according to Mr. C. H. Taylor, president of the company.

It is estimated that the insurance in force on the building would cover the loss, which is expected to exceed $15,000. Other policies cover stock and equipment. Six automobiles, two belonging to the state, two new cars and two second hand cars, were partially burned.

RODEO AT TAHOE CITY

The annual rodeo held Sunday on the meadows of Walker's Lone X ranch, a mile north of Tahoe City, drew a large crowd from Nevada and California. Miss Ida Costa of Truckee was selected as Queen of the Rodeo, Emma Daley, 14, of Truckee successfully rode a wild half grown steer from start to finish line; Billy Bechdolt, 8, of Tahoe City won the Shetland pony race and small Buddy Walker of Lone X ranch took highest honors in boys horse racing event. Walter Stevenson, Reno, Nev., won the cow pony race. Ted Walker of the Lone X ranch successfully rode a vile acting outlaw horse.

MINING JUBILEE TO BE HELD AT JOHNSVILLE

The Plumas County Chapter of the Mining Association of California is planning for a mining jubilee to be staged at Johnsville August 14th.

Invitations to attend the jubilee have been extended to Governor Rolph, Jr., Mr. and Mrs. Charles L. Gilmore, of Sacramento, and Congressman Harry L. Englebright of Nevada City. Gilmore is attorney for the association, while Mrs. Gilmore, who is active in public lands work, is honorary vice president of the Plumas Chapter. Errol MacBoyle, president of the state association and president of the Idaho-Maryland mine at Grass Valley, has also received an invitation to be present.

Ray L. Jefferson, president of the Plumas Chapter and superintendent of the Jamison mine near Johnsville, and Ned Richards, are arranging for the celebration.

Richards is assembling a minature ten stamp mill and Steve Pezzola is working on an arrastra, the latter a stone mill used in the early days in crushing ore along the streams of the Mother Lode.

LEGION POST TO HOLD THEIR ANNUAL BARBECUE

Next Sunday the Hague-Thomas-Hegarty Post, American Legion, will hold an all day barbacue and entertainment at Watt Park, near Grass Valley. A large crowd is anticipated as invitations have been sent out over Superior California and various local groups are also participating.

Among the entertainment features listed are: a ball game between the Grass Valley Miners and the Marysville Giants; horse races, automobile races, airplane stunting, and '49er camp feautres. Noted local chefs will prepare the barbecue.

It is expected that there will be delegations from all surrounding towns.

FRANKLIN TUTTLE HAS ARM OPERATED ON

Franklin Tuttle, who recently suffered a fractured right arm was operated upon at the Sutter hospital in Sacramento yesterday by Dr. R. F. Werner of Nevada City and Dr. Hoag of Sacramento. The complications that set in after the injury made the operation a necessity.

He is the son of Judge and Mrs. Raglan Tuttle. They will remain in Sacramento a few days to be near their son.

The boy received the injury while in the south on a trip with his father and brother.

Plumas County Men Are Callers at Nugget Office

Ray Jefferson of the Plumas County Chapter of the California Mining Association, and Mr. N. M. Srdanovich, both of the Jamison mine of near Johnsville, were visitors in The Nugget office Thursday afternoon. There is a small crew of men employed at the mine at present, but plans are to install machinery and open the mine in an up-to-date manner. They have retimbered the mine and will remodel the mill.

Visiting In Nevada City

Mrs. Mary McKeon of Sacramento accompanied by Charles A. Greif, his mother, Mrs. J. J. Greif and Miss Hazel Claire Kelly of San Francisco were visitors in The Nugget office yesterday afternoon. Mrs. McKeon owns 140 acres of land west of Town Talk. This ground lies in one of the richest gold belts in our district.

BIG CREW AT THE GOLDEN CENTER

The Cooley Butler interests in Grass Valley have a large number of men employed in the Golden Center mine which they reopened only a few months ago.

This property is one of the most promising mines in the Grass Valley district and Mr. Butler has taken hold of it and gone to work in earnest to develop and make another real producer in our section.

The mill is operating at present on a large daily tonnage of ore which is being mined from the 1300 foot level.

L. S. Wincapaw, who resides in Grass Valley, is superintendent of the mine.

The company has spent considerable time clearing out the old workings, retimbering and opening up new ground.

MILL BEING ERECTED AT HOGE DEV. CO. MINE

At the Hoge Developmment Company mine the cement foundation has just been completed and the frame work for the new mill is being placed in position at a rapid rate.

Lawrence Carter, cement contractor of Nevada City, has had the contract of laying the cement.

The Hoge mine is one of the newer mines of the district and many tons of rich ore have been taken out.

The property contains about 1200 acres of land in an almost virgin territory. It is in the neighborhood of this ground that the rich old Harmony Ridge channel was opened up and produced vast sums of gold.

North Bloomfield Road To North Columbia

The most spectacular mile of highway on the American continent lies on the Foote's Crossing road between Grass Valley-Nevada City and Alleghany. It is a trip for those who love to see nature at its grandest, far off the beaten path of wide pavements.

The most interesting route from Nevada City is up over Sugar Loaf on the North Bloomfield road, down and across the canyon of the South Fork of the Yuba river at Edward's Bridge; up the north side of the canyon to the top of the back bone where the road to North Columbia branches left away from the road to North Bloomfield. It soon runs along Spring Creek, an interesting relic of the old hydraulic days. For the debris from gravel mines filled the stream bed to a depth up to 20 or 30 feet. During the past half century erosion has carried away large slices of it, leaving, however, high banks of sparkling greyish white sand. An interesting side light on this debris that came from the ancient river channels where man searched for the gold that lay on the bedrock of these prehistoric streams is the story of two old prospectors who accidentaly ran into evidences of an old flume. They promptly set about washing all the ground close to where this old flume had been and were rewarded with two or three thousand dollars as a result of their month's work. Here and there the road passes small groves of gnarled fruit trees and tall slender poplars, monuments of the early pioneers who built their homes, which have long since disappeared, and surrounded them with orchard trees for their fruit and poplar trees for their ornamentation.

Thirteen miles from Nevada City lies North Columbia, formerly the headquarters of one of the San Juan Ridge's great hydraulic mine corporations, the Eureka Lake and Yuba Canal Company. The pretentious old office building, in the basement of which part of the gold refining equipment used to be, still stands. Close by is the old machine shop, in the back portion of which they formerly retorted the gold. Across the wagon road still stands the old black smith shop where in former days they made practically everything including the tools that were used about the diggings. In the yard lie some of the giant monitors that hurled 8 or 9 inch streams of water under several hundred feet of pressure against the high gravel banks, making them crumble almost like a sand bank during a flood. Across one

Continued on page three

BECKER VISITS IN NEVADA CITY

J. N. Becker, former superintendent of the old Mountaineer mine, who left Nevada City in 1911 to accept a position at the Crown Mines in Johannesburg, South Africa, is visiting old friends in Nevada City.

Mr. Becker is now underground manager at the Roan Antelope mine in Northern Rhodesia where he has been located for the past three years, being at the property since its inception..

The Roan Antelope is one of the world's low price copper producers. Situated some 4000 feet above the sea and although only about 13 degrees below the equator it enjoys a climate that does not, according to Mr. Becker, produce such sultry weather as we have been having here in the past few days.

The mine employs at present 500 natives and fifty whites. Isolated geographically in the heart of Central Africa, this mine is equipped with a club house, school and hospital which would do credit to a small city. With airplane service, modern electric refrigeration, talking pictures twice weekly, and radio reception which brings in the Pittsburg station quite clearly, it seems as if the world, after all is getting smaller constantly. With the present air service it is now possible to reacn Johannesburg, by way of London, in twelve days from New York.

Mr. Becker will remain in Nevada City until next week when he will continue on to the coast to visit relatives. He plans to meet Mrs. Becker in London early in September and the couple will make a tour of the principal European countries before returning to Africa at the end of the year.

VALUABLE BOOK FROM CONG. H. ENGLEBRIGHT

We acknowledge with thanks the receipt of a book on Geological Survey of Gold Quartz Veins, Proof Pamphlet No. 172 of the Alleghany District, gotten out by the U. S. Department of Interior and sent to us by Congressman Harry L. Englebright.

The book is accredited to Henry G. Ferguson and Roger Gannett and is a comprehensive survey of that productive district.

It contains a large number of maps, and charts besides much valuable information of that district.

Mayo Visits Nevada City In Interest of Candidacy

Jesse M. Mayo, candidate for assemblyman sixth district, was a visitor here the earlier part of the week and was introduced thru the business district by Gilbert Davis. Mr. Mayo is publisher of the Calaveras Prospect and The Californian at Angels Camp, and has long been interested in mining. He has been in the Calaveras district for ten years.

Recently he has made a study of Compensation Insurance with the idea of being conversant with that problem as it confronts the mining industry.

Gilbert Davis is principal of the high school at Angels Camp and he and Mr. Mayo have become ardent friends.

REV. AND MRS. H. H. BUCKNER ARE ON THEIR VACATION

Rev. and Mrs. H. H. Buckner left Wednesday on a two week's trip which will include a visit to their daughter-in-law and daughters at Esparto Berkeley, Oakland and San Diego.

Next Sunday the pulpit at the Methodist church will be supplied, by Dr. King, who is at the head of the educational work of Methodist church work. For the remaining three Sundays Paul Campbell head of the Epworth League of the state and his wire will be in charge of the work.

ENGLEBRIGHT SENDS THE NUGGET AIR MAIL MESSAGE

Just before going to press we received b air mail a resume of Congressman.. Harry L. Englebright's work in Congress the past session. We regret that it came too late for this issue. We will publish it in full next week.

Plans are under discussion for the organization of a new branch high school at Alleghany, California.

WEST MINES CORP. ANNOUNCES ACQUISITION OF PROPERTIES

ORLANDO McCRANEY, MANAGER, PLANS FOR DEVELOPMENT TAKING DEFINITE FORM SOON

Orlando McCraney, president and manager of the West Mines Corporation, announces that the company's plans are rapidly assuming form and that the outlook for increasing activity on the part of the company is encouraging.

Of particular interest at the present writing is the acquisition of a working bond on the Joseph Marshall ranch property together with all the mining rights that go with it. This well known property lies immediately north and adjacent to the Empress mine and contains some very favorable showings. Many authorities consider it a property equal in promise to the Empress itself and its further development will be watched closely by all who are in touch with recent developments in the district. The development of the Empress ore body has marked the commencement of a new era for the Grass Valley-Nevada City Districts by proving the wide extent of the gold enrichment in the immediate region. Mr. McCraney is firmly convinced that other discoveries of equal importance will be made in the vicinity of the Empress mine and he announces at this time that plans for the development of the Marshall ranch property are taking definite form.

The West Company has obtained possession of a key property in the Gold Flat section and is laying plans for an important development in that region. Mr. McCraney announces that plans for handling these developments and for working them on an adequate scale are already well formed and will be annouced to the public as soon as complete and after the properties included are checked as to title.

West Mines Corporation has obtained office rooms in the Masonic building in Nevada City and the officers expect to be settled and ready for business in the new quarters by the fifth of the month.

BOTTING AND POORE WORK QUAKER HILL MINE

Thomas Botting and Elmer Poore have a lease on the Quaker Hill Mining Corporation mine in the Quaker Hill mining district.

There is a 900 foot tunnel on the property, but they are working on the 600 foot tunnel on the south end of the property. Upon entering the tunnel they go up 14 feet and then into the blue lead channel that they are drifting in. The ancient river channel is very wide on this ground having been worked and crosscuts run for a distance of between 600 and 700 feet from the east to west rim. There are nearly three miles of the blue lead channel on the proprty extending from Gouge Eye to Scotts Flat.

Many thousands of dollars have been taken out of this property in the past and the ground is only scratched..

This mine is owned by eastern people and several years ago a fire destroyed some large buildings. On the property at this time are a cook house, bunk house, a Price grinding mill, two compressors, two electrical motors, one and a half miles of track one mile of three inch pipe, a wash plant at the mouth of the tunnel and a three mile high power electric line. The mill will handle from nine to nine and a half tons of gravel an hour.

While not taking out as much gold as they did a while back the men are well pleased with returns from the mine.

Three men are employed at the mine at the present time.

LONG TRIP MADE FOR MINING MACHINERY

Robert Lobdell of Nevada City recently made an 1800 mile trip into Oregon to haul mining machinery from Homestake to the Golden Center mine in Grass Valley.

The trip was made with two big trucks, Earl Silva being the driver of the second one. These trucks hauled 12 tons of machinery composed of two flotation units and various other mining material. They made the trip in about a week.

The Cooley Butler interests, who own the Golden Center mine in Grass Valley, also own the town of Homestake which has about 40 buildings besides the mining ground, nearby on which there is a mine.

In going up they left the main highway at Weed going through Klamath Falls, Bend, Baker City and on 90 miles to Homestake.

Mr. Lobdell said part of the state of Oregon they traversed was a wonderful game country, there being an abundance of trout, grouse, and Chinese preasants. Much of eastern Oregon is composed of small farms although there were some quite large.

He marveled at the low cost of the necessities of life. In some cities a good meal for a hungry man could be procured for twenty cents.

After leaving the main highway they struck fine graveled roads, although they were narrow practically all the way. It was a beautiful country with parts of the way leading over steep mountains with winding roads.

Mr. Lobdell covered a lot of territory but he thought our section the most prosperous he had seen, even though it seems quiet to us now.

LIONEL DAVIES OPERATED ON FOR APPENDICITIS

Lionel Davies, oldest son of Mr. and Mrs. Frank Davies, was operated upon Wednesday at the Nevada City Sanitarium for appendicitis. Dr. R. F. Werner of this city and Dr. J. Gordon Mackay of Auburn performed the operation.

His many friends wish for him a speedy recovery.

MORNINIG GLORY MINE PLANS TO START SOON

The Alleghany Morning Glory Mining Company has at last received favorable judgment in its long drawn out suit to quiet title to property at Alleghany. The mine is one of the old producers that has been semi-active for the past few years hampered by heavy bond and legal entaglements.

President A. R. Codd of the company states that the stockholders in the east have agreed to furnish sufficient capital to continue workk at the mine since the legal difficulties were straightened out.

About a year ago the late A. A. Codd of Reno, Nevada, took over this promising property and started active development. His death and other obstacles prevented the mine being opened at that time. Mr. Skewes of Grass Valley was associated with Mr. Codd in the operations at the mine at that time.

The surface plant is fully equipped with electrical machinery and mill, together with good underground workings, and the mine should be in operation in a very short time.

ANOTHER DRINKING FOUNTAIN IS NEEDED

If our townspeople could see the number of visitors to our city drinking out of hoses at service stations or asking for a drink of water it would not be long until there was a drinking fountain on the Plaza in plain sight of everyone.

There is no purer, colder and better flavored water in all this section than from our reservoirs.

In about a five minute period last Sunday evening between seven and eight o'clock 65 cars crossed the Plaza from Broad, Main, Nevada and Boulder streets and went out Sacramento street. Many of these were local people out for a ride, but a goodly number were from different localities and had come up here to visit relatives or enjoy a day in serves many a thirsty person but is in an out-of-the-way place to be seen by most people visiting in our midst.

The fountain near the city hall this delightful place.

THE NUGGET'S MISSION

THE NUGGET was established in Nevada City for the purpose of serving the mining interests of this district. To do this the owners have striven hard and often made personal sacrifices. The Nugget has been more than a country weekly,—a mere vendor of news facts. It has gone forth into the world saying, "Thar's gold in them thar hills," every week until at last people began to hasten and come to seek and to find the yellow metal. We are not egotistical enough to believe that we have caused Nevada county to lead in the gold production of the state. However, frequently we hear that around the mining exchanges in San Francisco and Los Angeles the Nevada City mining district is the most talked of district in the state and these men give no little credit to The Nugget. We are proud of that reputation and it our earnest desire to carry out the ideal upon which The Nugget was founded.

ENGELBRIGHT BACK

Congressman Harry L. Engelbright is expected back from Washington today (Friday,) and his fellow townsmen are eagerly looking forward to seeing his smiling countenance again. Harry has worked so hard in congress this seasion that it took him two weeks after the close of the recent session to clear his desk and finish matters on hand.. His ordinary working day when congress is in session is 16 or 18 hours. He is as well liked in the Democratic field as among the Republicans.

The Truckee Republican a few months ago ran an editorial criticising Englebright but that wa sbecause Stanley Bauvier the editor was a new comer here from the east and did not understand Congressman Engelbright was on the job for his district first, last and always.

OPPORTUNITY knocks but once at a man's door they say,—and he is knocking loudly now at the door of mine and claim owners. For more than a year past there has been a stir in this district but cash seemed lacking with which to consumate the deals. Now however, money is beginning to loosen up, and where there is so much smoke there is bound to be fire. Now the burden will rest with the property owners.

I am reminded of a story I heard recently which somewhat illustrates this point: During the war between Japan and Russia some homesteaders in the state of Washington accidently discovered a deposit of antimony, a mineral in demand at that time by the Japanese for use in the manufacture of gun powder. A firm in Seattle upon hearing of the discovery immediately wired an offer of $20,000 cash and 40 per cent of the net profits. Now thses particular homesteaders were in even more straightened circumstances than the average. All credit had been cut off from them in the trading center in a near by town,—liberal as that community was to homesteadwired back "Yes." Oh, no! They decided to mine for themers. Do you think that under the circumstances they eagerly selves and went to work. By the time they had five tons out the war was ended. They still had their antimony,—useless now and the Seattle firm still had the $20,000.

—Elsie P. Willoughby.

OLD TIME MINING COMING BACK ON STANISLAUS

The rivers and streams of Calaveras county are again taking on the atmosphere of '49, according to Supervisor L. Monte Verda of that county, who recently made a survey of the Stanislaus river and its tributaries. There are scores of miners and their families camped along these streams all panning for gold with the crude methods of the early day miner. The "long tom and rocker" are much in evidence.

Along with the revival of this type of mining, the old laws such as miners enacted among themselves have been re-enacted by the new miners. On the Stanislaus and Coyote creek the men have staked off their claims, each family allowed so much land, with the kangaroo court for those failing to obey the laws as set forth by the colony of amateur miners. To date there has been no report of any claim jumping.

And the gold washer of 1849 did not get all the values out of the gravel, as the present gold washers are getting from 40c per day to $3 with their crude implements.

The mine colony along the Stanislaus is made up mostly of unemployed from Southern California, according to Monte Verda.

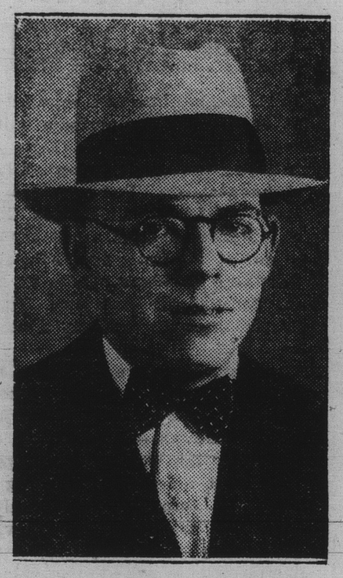
MINING COMING BACK DECLARES JESSE M. MAYO

Returning home this week after a swing through the ten counties of the sixth district Jesse M. Mayo, candidate for the Republican and Democratic nomination for Assemblyman predicted that mining would be the vehicle for a return to prosperity for the mountain counties. In every



JESSE M. MAYO

county of the ten from Nevada on the north to Inyo on the south, Mayo found an unprecedented interest in mining. The hills are full of prospectors and operators, all looking for the precious metal, stated Mayo.

Besides publishing Calaveras county's only two newspapers, Mayo is a member of two service clubs in his county and the chamber of commerce and is a member of the publicity committee of the regional district of the state chamber of commerce. He also served two years in the United States Navy aboard the U. S. S. Pennsylvania, Uncle Sam's finest floating fortress.

Mayo's platform for the assembly advocates measures for the reduction of both state and county taxes, with a return of the power of expenditures to the respective counties. He stated that in 1913 local authorities controlled two-thirds of all county expenditures, whereas today they control less than one-third. He is also making a definite study of the high cost of mine compensation insurance and is formulating several measures which he believes if adopted will lower this cost, which is the most disturbing factor in the rehabilitation of mining in the mountain counties.

CARVIN MINE FINDS LEDGE OF GOOD MILLING ORE

Vernon Carvin who has been trenching for six weeks on the ledge found by his father more than a year ago, recently uncovered a 6-foot 4-inch solid ledge of ore at the Carvin mine in Yuba Pass that is believed will mill from $3 to $4 per ton in gold. No other metal except molybdenum is present in the ore so far as has been ascertained.

The Carvin property, which consists of five claims and mill site, has eight distinct ledges, carrying gold, silver, copper and molybdenum. Preparations are being made for development of this property on a scale that seems justified by prevailing conditions.

SAFETY GROUP STARTS CAMPAIGN ON "ROAD HOG"

"Your half of the road is not in the Middle."

Using this pointed phrase as a slogan, the California Committee on Public Safety is devoting the month of August to a statewide campaign against the type of driver familiarly known as the "road hog." The danger, discourtesy, and unlawfulness of monopolizing the center of the road will be emphasized by a variety of educational and other activities with the cooperation of enforcement authorities and civic groups. In a statement announcing the campaign the committee says:

"Proper consideration for the rights of others and fundamental rules of safety require that all operators of motor vehicles should drive on the right side of the street or highway upon which they are traveling. If all motorists complied, traffic movement would be greatly facilitated and the accident hazard materialy reduced. The 'road hog' has long been a familiar figure on our highways. His tendency is to travel at all times alongside of or astraddle the center line of the roadway. He is a real menace to the motoring public."

Ecerpts from the law are quoted as follows:

"The driver shall drive as closely as practicable to the right hand edge or curb of the highway, except when overtaking and passing another vehicle, or when placing a vehicle in position to make a left turn."

"When approaching within one hundred feet of any bridge, viaduct, tunnel or railroad crossing, or intersection of highways, each driver of a vehicle shall at all times drive upon the right half of the highway unless it is under repair or temporarily closed to travel and for such reason impassable."

MUCH PROSPECTING IN DOWNIEVILLE-SIERRA

Much development work is going forward at Downieville and Sierra City in the mining districts, and hundreds of snipers are panning the streams.

Near Sierra City the Sierra Buttes is working seven men in developing. The Sacred Mound is using five men, and ocasionally milling some ore.

In the Downieville district, the whaler, right in town, under J. J. Cude, has four men prospecting, at present drifting. This operation has just started.

The Standard, in Sailor Ravine, is using four men to develop.

The Ruby mine, in the Rock Creek district, is being opened, a gravel property. The Gold Bear, or Gum Boot, is being pumped out. The Gold Hub, under Mr. Hinton, is being drifted.

The White Bear, Ed Pugh, and the Telegraph, Appaloni brothers, west of town, are being developed.

GRASS VALLEY

MANY GOOD PROSPECTS LOCATED IN SHASTA CO.

Redding, local business men say, is badly in need of a custom mill, for there are more prospectors working the hills north and west of that city than for many years. In the aggregate, much development work has been done, and many prospects are at the stage where the owners will have to mill some of the ore they have taken out in order to finance further work, or top rove their efforts. In addition, there are, perhaps 1000 snipers in the districts.

A Mr. Harvey of Boston, working a small crew of men on the Harmont, recently uncovered a blind ledge of good ore. A. M. Holbrook is superintendent.

Another Mr. Harvey of Marysville, has secured the American mine and moved to the ground, where he is planning to rush development work.

There are several good prospects in the Old Diggings district which has produced many millions in gold in the early days, and several deals with outside capital are pending.

Copper remaining down, the huge mines and smelter at Kennett and Coram are in ruins. The Iron Mountain Copper mine, however, has been more fortunate, and is mining gold from an overlay strata profitably. M. J. Murphy is superintendent for the English owners. The mine is a steady producer of the yellow metal.

V. S. McClellan is opening up the old Trinity-Mohawk on top the divide.

NEW CHICO OPERATION

The Pleasant Valley gravel mine, 13 miles east of Chico, known as the Centerville district, have 60 acres of placer ground and are now washing 40 yards per hour with values running over 50 cents to the yard, which will increase with depth. P. W. Roy of 3124 E. 14th street, Oakland, is president and general manager. Equipment has been furnished by the Western Machinery Company.

The Yellow Aster's 50 stamps are dropping day in and day out, on a three shift basis. Ten of the stamps on leasers' ore.

SAN ANDREAS MINING ACTIVITIES GREATER

San Andreas, famous old gold town, is waking up again, with many minor activities taking place, especially in the the way of prospecting. The Union Consolidated at Murphys, a quartz property ,is employing 31 men. It was opened about six weeks ago.

The Oro Plato is working and the Douglas Flat mine has recently been reopened with 15 men on the payroll.

The Vallecito Western, with Don Steffa as superintendent, is now working about ten men.

McDow Mine Quartz Mill To Start Operations

Installation of a stamp mill at the McDow mine on the northern slope of Diamond mountain, Lassen county, has been progressing rapidly, according to George McDow, Jr., who is in charge of operations at the mine. All the heavy machinery has been installed and milling will commence as soon as the power equipment is connected with the mill and the plates and concentrating tables installed. The milling equipment and installation is being financed by private capital.

OLD RED STAR GRAVEL MINE BEING REOPENED

The Red Star gravel mine, some 10 miles fror Last Chance, Placer county, originally discovered and worked about 30 years ago by Dave Ray of Last Chance, has been bonded to C. H. Simpson and E. A. Stoner of Texas and F. M. Lincks of Placer county. The three have spent much time in building trails and other preparatory work, and now are getting under operation, with an excellent chance of making a splendid producer.

There are two channels on the property, one blue gravel and one red gravel, the red being the richer in values. Many thousands of dollars in gold were easily extracted from these gravels when the mine was first operated . The property lies just below the Glen mine, owned by Senator J. M. Inman.

D. M. Ray, the discoverer of this property, and probably one of the best authorities on placer mining in California, came to Last Chance in 1864. Mrs. Ray was born in Last Chance, and the couple have lived there most of their lives, Mr. Ray being largely responsible for the later mining activities of the camp, having discovered or opened several of its larger producers, besides many prospects.

Last Chance is 57 miles from Auburn, via Forest Hill, and is the end of the road.

Company Organizes Kirkpatrick Gold Mine

State Treasurer Chas. G. Johnson, as one of the directors, recently filed articles of incorporation as the Kirkpatrick Gold Mines Co., with the secretary of state. The company is incorporated with 1,000,000 shares par value $1. Other directors are James D. Stewart, Auburn; O. N. Duffy, Napa, and F. F. and John Clark of Sacramento. This property is situated near Goodyears Bar and had a small crew of men employed all last winter. They have completed a great deal of development work on the property which is a gravel mine.

COMPROMISES MADE ON G. V. BOUNDARY MINE

Last week an announcement was made in Grass Valley that the orgy of litigation involving the Grass Valley Boundary Mine for five years had been halted by a compromise agreement between the M. J. Brock and the Joseph Slye interests.

The mine is situated at the west city limits and gives promise of being one of the large mines of the district.

It is expected that the property will open within a short time.

NOTICE TO CONTRACTORS

Bids will be received for immediate completion of approximately 130 feet of 5 by 9 raise to connect Tunnels No. 2 and 3 at the Twin Sisters Quartz Mine at Snow Point. Raise now up 200 feet at an average dip of 60 degrees.

Contractor to supply board and bedding at $1.00 per day; to furnish powder, caps and fuse, to timber raise and chute.

Company to supply power, tools and equipment as well as timber and to sell powder, fuse and caps at cost, although Contractor may submit a separate bid covering powder, fuse and caps if he so desires. Electric blasting equipment furnished.

Bids to be submitted on a lineal foot basis. Work to be completed within 40 days of the signing of contract.

Company retains right to reject any and all bids.

For information concerning underground conditions see Edw. C. Uren. Bids will be opened August 10th and should be submitted immediately to the secretary.

C. L. WHITE,
17 Harcourt Street,
San Rafael, Calif.

MISSING PEOPLE SOUGHT

An inquiry has been sent to The Nugget requesting that we call attention to a search being made for James and Johanna Nolan, who lived in this vicinity years ago.

According to information they had a daughter named Margaret born about 1857, as well as other children named Mary, Kate and Lena. Possibly some of their descendents are readers of your paper, in which event it will be to their interest to get in touch with us at once, giving full particulars of the family history. Likewise, any friends of the family having information as to where relatives might be found will be doing a favor to all concerned by sending us whatever data they can.

An estate valued at $3,000 is involved.

AMADOR COUNTY MINES SHOW GOOD VALUES

The Amador Star mine, four miles north of Plymouth, leased to John Ratto, who has been prospecting for the past year, has been taken over by the A. Hamburger Mines of Los Angeles. They have developed it to a satisfactory depth and are installing machinery to begin mining on a larger scale.

The company purchased a ball mill from the Treasure mine near Amador City. Some very good ore has been taken from the mine and it is expected that with deeper development the ore will be of better value.

A new mining property known as the Three Horsemen has been started by A. M. Edwards, Sam Tulinson and Nick Contini. At present the operators are said to have a four-foot ledge which shows values averaging from $30 to $40 a ton. The Three Horsemen property is located in the Weiland section.

At the Hardway mine near Pine Grove, Amador county, operations are progressing. The shaft now has a depth of 50 feet and values are getting better. Firteen tons of ore have been blocked out and are ready to be milled.

North Bloomfield Road To North Columbia

Continued from page one

of the ditches which carried the water to the diggings stands the erstwhile superintendent's home on the very brink of the mine that still contains perhaps a hundred millions of gold, for they were still many feet away from the bed rock of the ancient channel when work was stopped by the supreme court decision that validated the Federal Anti-Debris Act.

Many of the old homes and buildings still stand at North Columbia but the old store which was run for half a century by the late Phil Curnow was most unfortunately burned down in 1930. This store was formerly one of the toll stations on the world's first long distance telephone line. Here we get onto the stage road for Alleghany that has followed a longer route from Nevada City to this point. As we leave this old 49'er town on the left of the road can be seen what remains of one of the old thorough-braced stages, which in early days carried passengers, mail, express, and gold across the mountains. The leather straps that carried the body with a rocker like support—as well as other parts have been removed piece meal—leaving but a shell of this imagination stirring relic — that should have been preserved in its entirely. Steps should be taken at once to save what is left. We climb higher up the ridge and turn to look back over thousands of acres of hydraulic land. At the top of the grade is the Tip Top Ranch. The winding road crosses Grizzly Creek to the junction of the Delhi Mine.

GEORGETOWN'S ALPINE MINE BEING REOPENED

The Alpine mine, two miles southwest of Georgetown, owned by H. C. Burks and R. J. Nelson of Georgetown, has been bonded to W. R. Maloney and associates, who are rapidly equipping the mine for production. Maloney was former mining inspector in Alaska and is a thorough mining engineer with world of experience.

The mine has been dewatered to the 300-foot level, and a thorough examination made of that level as well as the 200 level, showing ore shoots to be larger and richer than previously estimated, carrying a general average of over $7. Examinations have been conducted for the past seven months.

At present excavations are being made for installation of a 150-ton Buchanan-Best mill for primary crushing. Sixty percent of the product of this mill will be under 60 mesh and will go to six cells of flotation. A Harding ball mill will care for the coarser product.

It is planned to begin milling about September 1, bringing ore from the 200 and 300-foot levels and crushing it, and at the same time working over the old 100,000-ton dump, which carries a worth-while amount of gold. All operations will be powered by electricity.

The Alpine was last worked by George Wingfield and associates of Nevada, who are said to have taken a small fortune out. This was in 1907. Seven years ago the property, consisting of 80 acres patented and three adjoining claims, was acquired by the present owners. The mine was originally discovered and worked by Walker Brothers of Salt Lake, and there have been three mills on the property in times past, the last one burning down.

The mine was allowed to remain idle because of high mining costs during the past two decades, but now that prices have come down, the property should make its owners and operators rich.

Camptonville Gravel Property Is Leased

Mrs. A . Martignone has leased part of her property adjacent to Willow Creek to William Burns and associates. The property is said to contain considerable gravel.

CALAVERAS CENTRAL NEW INSTALLATION

Bidding fair to become one of the richest gravel mines in the state, the Calaveras Central mine at Altaville, near Angels Camp, has about completed exploration work and repairs to equipment, and are planning immediate installation of new equipment. It is planned, acording to W. H. Warnick, superintendent, to get into active production shortly with a payroll of some 35 men. The old river channel has been entered and many thousand tons of ore in sight run from $4 to $6 and up.

The plant is entirely electrically equipped, using two types of muching machines, a drag line and double-drum hoists. All tramming, etc., is run by electric motors, and 22-to ncars are used. In addition to present milling equipment, a new rod mill is to be installed, which will save practically 98 percent of the values.

TRINITY SNIPERS SELLING SMALL AMOUNTS OF GOLD

Although many of the hundreds of gold panners who have flooded Trinity county in the last few months are amateurs, the amount of gold dust purchased at the Trinity County Bank from these small-scale miners has almost doubled that taken in at even date last year.

Mrs. Eleanor C. Edwards, president of the bank, states that about $1500 in gold dust is taken in each month this season. This does not include the regular shipments from the developed mines of the county having large payrolls.

Collection of dust worth as little as 10 cents are brought in for exchange.

Here is a news item: A batch of ore sent to the famous Kelly mine mill, assayed $14.80; the mill gave $27 to the ton.

LEGAL NOTICE

NOTICE OF TRUSTEES' SALE UNDER DEED OF TRUST

WHEREAS, Amanda J. Rapp, on August 21, 1915, executed and delivered her certain Deed of Trust to F. D. Philips and George K. Rogers, as trustees, for the benefit and security of the California Prudential Society, a corporation, to secure the payment of a promissory note in the sum of $800.00, with interest thereon, which said Deed of Trust was recorded, in the office of the county recorder of the County of Nevada, State of California, Volume 1 of Trust Deeds, at page 419, et seq. Nevada County Records; and,

WHEREAS, the said promissory note, together with interest thereon, for value received, thereafter and before due, to wit, December 1st, 1915, was duly assigned by said beneficiary thereof to the Union Home Builders, a Trust Estate, together with all their rights, title and interest in and to the said Deed of Trust, securing said promissory note; and,

WHEREAS, the said promissory note, together with interest thereon, for value received, thereafter and before due, was duly assigned by said Union Home Builders, a Trust Estate, to the Merger Securities, Inc., a Delaware Corporation, together with all its rights, title and interest in and to the said Deed of Trust, securing said promissory note; and,

WHEREAS, the said Merger Securities, Inc., as assignee beneficiary under said Deed of Trust, on October 5, 1931, recorded a Notice of Default and Breach and Election to Sell, under said Deed of Trust, in Book 12 of Official Records, page 93 et seq., thereof, of Records of Nevada County, State of California; and,

WHEREAS, the said Merger Securities, Inc., pursuant to said Notice of Default and Breach of Election to Sell, under said Deed of Trust, as the owner and holder of said promissory note, secured by said Deed of Trust, after repeated demands for payment of said note and interest thereon, has elected to sell the real estate in said Deed of Trust described, to satisfy said indebtedness; said real estate is more particularly described as follows, to wit:

All that portion of Lot No. Four (4), in Block No. Fifty-two (52), of the City of Nevada, as said lot and block are designated upon the Official Map of said City of Nevada, made by H. S. Bradley, in the year 1869, described as follows, viz:

Commencing at a point on the westerly line of Sacramento Street, 93 feet northeasterly from the northeasterly corner of Lot No. 5, in said Block No. 52, (said Lot No. 5 in Block No. 52, formerly owned by J. D. Fleming); thence northwesterly at right angles to the westerly line of Sacramento Street, to the center of Deer Creek; thence northeasterly along the center of Deer Creek a distance of 45 feet; thence southeasterly to a point on the westerly line of Sacramento Street 45 feet northeasterly of the place of beginning; thence southwesterly along the westerly line of Sacramento Street, 45 feet to the place of beginning, all in Nevada County, State of California; and the said Merger Securities, Inc., a corporation, does hereby give notice that on Tuesday, the 16th day of August, 1932, at the hour of 10:30 o'clock A.M. of said day, at the Front Door of the Court House, in the City of Nevada, County of Nevada, State of California, it will sell, at Public Auction, to the highest bidder, for cash, in hand, in lawful money of the United States of America, all that certain real property hereinbefore last described.

TERMS OF SALE, cash in hand at drop of hammer; and the said owner and holder of said note, or any person ,may purchase at said sale.

Dated July 18, 1932.

PERSONAL MENTION

Mrs. T. A. Lane of San Francisco is visiting her mother, Mrs. Mainhart and sister and brother in Nevada City.

Mrs. Robert Allen of Boulder street is recovering from a recent sick spell.

Mr. and Mrs. Joe Holland and son and daughter of Grass Valley visited with Mrs. Robert Allen Monday.

James Grimes of Oakland, who is one of the owners of the American Flag mine, is spending a few days in Nevada City with relatives.

Mrs. P. H. Spellenberg and son and daughter, Homer Spellenberg, and Mrs. Rimby, of Arcata, arrived in Nevada City Monday to visit with Mrs. Spellenberg's brother, Dick Fisher.

Miss Beth Young returned recently from a two week's vacation spent in Sacramento with her friend, Miss Greta Edholm. Harold McAnaw accompanied her home Tuesday returning the next day.

Andrew Walker, who was superintendent at the Snow Point mine, left Tuesday evening for Los Angeles He expeets to return in the near future to look over mining property in the vicinity of Downieville and Graniteville.

Mr. and Mrs. Arthur Dolan and family of San Francisio are here to visit with his brother, James Dolan and wife. Mr. Dolan is a police officer on the beach at the Cliff House and enjoys his vacation here in the mountains.

NEWS IN BRIEF

Miss Rachel Penrose visited friends in Sacramento Sunday.

Mr. and Mrs. Elza Kilroy and son are spending a vacation at Monterey.

Judge Winburn of Grass Valley was in Nevada City early in the week..

Miss Elma Hecker visited with Mr. and Mrs. Milton Keefer at Milton last Sunday.

Frank Davies spent several days in San Francisco recently attending to business matters.

Mrs. Morgan of Oakland is visiting her mother, Mrs. Tom Hogan and brothers and sisters.

Mr. and Mrs. Fred Breese had as recent visitors Mr. and Mrs. John Upton of Los Angeles.

Mrs. Elliott and Mrs. J. J. Jackson enjoyed about a ten day visit with relatives of the former in Reno.

Miss Frieda Hieronimous has returned from a two weeks vacation spent in Los Angeles and San Francisco.

County Superintendent of Schools Mrs. Ella M. Austin is spending a vacation in San Francisco visiting with relatives.

Mrs. John Rafter, a former resident, is visiting her sister, Mrs. McCormack, and brothers and sister in Nevada City.

F. M. Merrilees, mining man of Los Angeles passed through Nevada City enroute to his property in the Graniteville section.

George Coughlan, former county clerk, is home from several weeks spent at Campbells Springs. He feels much improved in health.

Supervisors Joe Frank of Rough and Ready, Alex Robertson of Hobart Mills and E. B. Dudley of North Bloomfield have returned home after attending the regular monthly session of the Board of Supervisors.

SMALL STAMP MILLS WANTED

We have calls for small stamp mills that can be handled by one man. State location and price with full details in first letter.

OLD KISTLE HOUSE ON SPRING ST. BEING REPAIRED

The house just back of The Nugget office which faces on Spring street, is being repaired by Campbell and Richards, carpenters. It is the property of the Kistle estate and is being remodeled and repaired so as to place it in condition to be painted.

Truckee Bids For Plant—

The town of Truckee has petitioned the railroad commission for permission to purchase a private power plant, the Sierra Pacific Power Co. The purchase price will be $7,000 and will be bought from the four years profits of the Truckee Public Utility district.

Another New Home in Our City—

Anton J. Rore recently purchased a lot on Prospect Hill and is at present making an excavation for a basement. Plans are for a pretty bungalow, 36 by 24 feet, with all modern conveniences, which will be enjoyed by himself and family.

Jack Grissel has just had his home on Coyote street freshly painted. It adds much to the looks of the property.

Mrs. W. E. Wright and daughter, Miss Eugenie, returned home Sunday evening from a vacation spent in the bay region.

Miss Clara Angiolini and Reginald Pratt motored up from San Francisco Saturday and spent the week end here visiting her father, M. Angiolini

Miss Helen Calanan of San Francisco was a recent visitor with her parents, Mr. and Mrs. George Calanan.

Mrs. Catherine Celio is spending a vacation in Santa Clara with her father and other relatives. Her children have been there for some time and will return with her.

LOWER GLEN OPENED

F. K. Flickenger has taken a lease ont he Lower Glen near Last Chance, and will develop. This property is near the Glen mine operated by Senator J. M. Inman.

CAMPTONVILLE NEWS NOTES

The Camptonville high school held its annual pilgrimage to the Cross Thursday of last week. About thirty students, graduates and parents attended. Several years ago the school erected a large wooden cross on the top of Pendolas hill, and once every year they make a journey to it, with a fitting ceremony. A brief literary program was enjoyed, and a delightful picnic lunch assisted in bringing another very memorable occasion to a close.

The annual Lake Almanor fishing party composed of Mr. and Mrs. Earl L. Cleveland of Sacramento, Mr. and Mrs. Robert Danneberg of Felton, Mrs. F. J. Joubert of Oak Valley, Fred Jackson of San Jose and J. E. Jauly of this place, left Sunday morning for the lake on a two weeks fishing trip.

Mrs. Olive Groves left a few days ago for Auburn called there by the death of a relative.

Mr. and Mrs. Ruben Halkyard and family of San Francisco arrived Tuesday on a visit to relatives.

Mrs. Kate Hope Livingston, local high school teacher, accompanied by her grandson and Kenneth Fowler, motored to Berkeley last week end.

Fred J. Joubert motored to Nevada City Monday.

Mrs. Rachael M. Labadie and Miss Lola M. Labadie motored to Marysville Tuesday.

A. Labadie of Browns Valley is visiting his aunt, Mrs. R. Labadie.

Mrs. Virginia M. Lord left Saturday for Sacramento after spending two weeks vacation with her parents Judge and Mrs. W. B. Meek.

Mr. and Mrs. Acton Cleveland motored to Marysville Friday.

James L. Joubert visted in Sacramento Saturday.

J. E. Pauly motored to Marysville Thursday.

Mrs. Henry Huckins of North San Juan is visiting in Downieville.

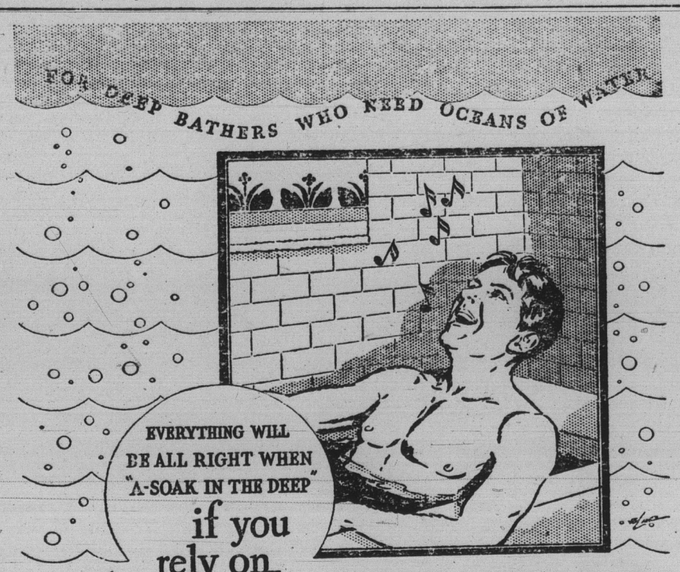
R. G. Dunwoody of the True Grit mine motored to Nevada City Friday

Mr. and Mrs. Bruce Nightengale of San Jose passed thru town Saturday from a trip to Canada enroute to Alleghany on a visit to his sister, Mrs. R. M. Foley.

WHY PAN GOLD For a Meager Living?

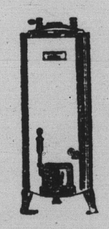
Be one of the fortunate, use skill and wisdom. Find the richest spots. Get your big stake now and be independent when winter comes. Thousands are now combing the hills and reports of many rich finds have been recently made in various parts of the gold country. These were mostly "lady luck" finds after much hardship. Don't go out half cocked, spend $1.50 or $3.00 extra on your kit by adding the Guggenheim Gold Detector and add more wisdom than luck to your finds. These are indestructible, scientific instruments with which you may without any knowledge of your field, find plenty of placer gold and silver and rich placer pockets that often contain fortunes. No prospector should start on a trip without them. Price $1.50, professional size $3.00. Send money order or cash. If you are dissatisfied with them inside of 10 days, send them back and we will refund your money.

GUGGENHEIM CO., Equipment Dept.
155 Montgomery St. San Francisco



if you rely on *Automatic* HOT WATER

There is nothing quite as effective to soak off a tired summer feeling or pep up a day as a lingering loll in a deep bathtub full of warm water. It is a sure cure for the prevalent summer wilt, with but a single "if"—if you have hot water automatically available.



Summer is the best time of all the year to enjoy oceans of warm water, and the best way to get it is to have an *Automatic Hot Water Heater* installed. Summer too, is the time of the year when hot water is most needed—more bathing, more washing demanded—less inclination to build fires for waterbacks or strike matches to start an old-fashioned water heater into action.

With an *Automatic*, hot water is kept stored in adequate supply for immediate use. It is in the pipe and out of the faucet whenever you need it, day or night, without delay.

These modern *Automatics* are low in cost, down within the means of everyone. Your local P. G. and E. office or your dealer in gas appliances can convince you of this.
